Quality Outreach report March 2019

Quality Outreach Report introduction.

The first Quality Report was published in September 2015 here, our initial intention was to provide a report every six months. We now release a new Feature Release every 6 months so we have decided to publish a Quality Outreach Report every three months.

The previous report was issued in December 2018 here.

- Section one looks at the increasing number of FOSS Projects being added to the Quality Outreach wiki
- Section two lists Bug logging activities over the past three months (January 2019- March 2019).
- Section three lists traffic on quality-discuss@openjdk.java.net
- Section four lists projects that have been granted Author Status & JBS Accounts.

1.0 FOSS Projects listed on Quality Outreach Wiki.

We now have 120 FOSS Projects and their developers listed on the Quality Outreach Wiki page, this is an increase of 10

FOSS Projects since the last report in December 2018. New Projects added :

1. Apache Netbeans
2. Apache Wicket
3. FXyz
4. guice-async-extension (1.2.1)
5. HdrHistogram
6. PicoCLI
7. restrict-imports-enforcer-rule (0.16.0)
8. semantic_version (2.0.0)
9. Susel
10. JNA

Note, we have a further 14 Projects that we communicate with that are not listed on the wiki i.e 134 projects in total.

All FOSS Projects receive regular updates when Early Access (EA) builds become available, they are encouraged to test and report back any issues they find during their testing.

2.0 Bugs logged since January 2019

Developers from 9 of the 134 participating projects filed 13 new issues in the JDK Bug System, thank you !

The number of bugs logged during the last three months has increased. More information in the table below.

4.0 Author Status & JBS Accounts.

We have granted Author status to a number of FOSS Project contacts in recognition of their contribution to the Quality of recent JDK Releases.

They have logged a significant number of high quality bugs over the last number of years on various JDK Releases.

1. JUnit5
2. Apache Batik
3. Apache Ant
4. Eclipse Jetty
5. Apache POI
6. Apache Lucene
7. JaCoCo
8. jOOQ
9. Byte Buddy
10. Apache Derby
11. Apache PDFBox
12. Apache Tomcat
13. Hibernate
14. Apache Maven

If you feel you have contributed to the Quality of recent JDK Releases and would like to be considered for Author status, please contact rory.odonnell@oracle.com

The next Quality Outreach report is due in July 2019.
