

git-skara

Description

git-skara is primarily used for updating the [Skara CLI tools](#) but can also be used to launch individual commands.

Usage

```
$ git skara -h
usage: git skara <defpath|fork|help|hg-
export|info|jcheck|pr|proxy|publish|sync|token|translate|trees|update|version|webrev>
```

Additional available git commands:

- git defpath
- git fork
- git hg-export
- git info
- git jcheck
- git pr
- git proxy
- git publish
- git sync
- git token
- git translate
- git trees
- git webrev

To learn more about a particular command, run:

```
git <command> -h
```

For more information, please see the Skara wiki:

```
https://wiki.openjdk.java.net/display/skara
```

Examples

Updating the Skara CLI tools:

```
$ git skara update
```

Run the "info" command via git-skara:

```
$ git skara info HEAD
Author: Robin Westberg <rwestberg@openjdk.org>
Reviewer: ehelin
Review: https://git.openjdk.java.net/skara/pull/758
Issue: https://bugs.openjdk.java.net/browse/SKARA-448
```

Show help for the "sync" command:

```
$ git skara help sync
usage: git sync [options]
    --from REMOTE      Fetch changes from this remote
    --to REMOTE        Push changes to this remote
    --branches BRANCHES Comma separated list of branches to sync
-u, --username NAME   Username on forge
    --pull             Pull current branch from origin after successful sync
-ff, --fast-forward   Fast forward all local branches where possible
    --verbose         Turn on verbose output
    --debug           Turn on debugging output
-v, --version         Print the version of this tool
-h, --help            Show this help text
```
