

Compiler

OpenJDK documents

- overview of the **JIT compilers**; does not exist yet: <http://openjdk.java.net/groups/hotspot/docs/Compiler.html>
- [glossary of terms](#) found in the HotSpot sources and documentation
- [Thinking About Intermediate Representations](#): in general terms, what an IR is and how it works

Interesting tasks to do

- Pull documentation from internal j2se/HotspotCompilers and javaweb/hotspot/Compiler (Sun engrs. only).
- Document major classes of optimization.
