

git-info

Description

`git-info` shows OpenJDK information about a Git commit, for examples reviewers, link to issue(s) etc.

Usage

```
$ git info -h
usage: git-info [options] <REV>
    --no-decoration    Do not prefix lines with any decoration
    --title            Show title of commit message
    --issues           Show link(s) to issue(s)
    --reviewers        Show reviewers
    --review           Show link to review
    --summary          Show summary (if present)
    --sponsor          Show sponsor (if present)
    --author           Show author
    --contributors     Show contributors
    --verbose          Turn on verbose output
    --debug            Turn on debugging output
    --version          Print the version of this tool
    -h, --help         Show this help text
```

Examples

Show information about commit [24e9d356df3](#) in the [openjdk/jdk](#):

```
$ git info 24e9d356df3
Title: 8252368: Undo JDK-8245002: Windows GDI functions don't support NUMA interleaving
Author: Stefan Karlsson <stefank@openjdk.org>
Reviewers: eosterlund, sjohanss
Issue: https://bugs.openjdk.java.net/browse/JDK-8252368
```

Show only reviewers for commit [24e9d356df3](#) in the [openjdk/jdk](#) and do not output any decoration (useful for scripting purposes):

```
$ git info --reviewers --no-decoration 24e9d356df3
eosterlund, sjohanss
```

Show link to the review for commit [159f939a](#) in the [openjdk/skara](#) repository:

```
$ git info --review 159f939a
Review: https://git.openjdk.java.net/skara/pull/758
```

(note that `git-info` can only shows links to reviews that have been done via pull requests)

Configuration

All flags to `git-info` are configurable, so that you can customize the default output. For example, the following configuration make `git-info` only show the title and link to any issues by default:

```
$ git config --global info.title true
$ git config --global info.issues true
```
