## Push Requests

During the later stages of a release cycle, the release enters *rampdown*. If a change needs to be pushed to a release in rampdown, push approval can still be requested using the [jdk23u-critical-request](#) label. As the name of this tag suggests, this process is intended for fixes such as major regressions that must make the release. The maintainers may approve with [jdk23u-critical-yes](#). Once the requester has pushed a critically approved fix it will automatically be included in the targeted release.
