

# Native Memory Tracking

## Development items

### NMT coverage across the whole JVM process

See <https://mail.openjdk.org/pipermail/jdk-dev/2023-December/008491.html>

### Adding the real RSS/dirty page count to mmap regions

See <https://bugs.openjdk.org/browse/JDK-8249666>) - since "Committed" is often rather useless in analyzing footprint

### Cleaning up the dirty hacks around arena accounting

See <https://bugs.openjdk.org/browse/JDK-8325890>
